

# Nexus release notes

**Rollout Date:** 31/03/2026

**Version:** v2026.82.2.0

## Contents

User can see SKUs at all sites, not just the one they are on when relocating #246 ...	1
Duplicate orders importing #228 .....	1
Mass De-pick by pallet #167 .....	1
Make "Returns" the default reason code when adding stock #252 .....	2
Behind the scenes.....	3

## User can see SKUs at all sites, not just the one they are on when relocating #246

This issue has now been resolved to only show locations for the site which the device has been configured for.

## Duplicate orders importing #228

A Helpdesk issue was raised reporting that duplicate orders were being imported. This has now been resolved.

## Mass De-pick by pallet #167

## Make "Returns" the default reason code when adding stock #252

The default reason code will now be "Returns" as requested by ops.

Time	Current System Stock
18 Mar 2026 14:16	Stock Adj. Reason: Added to stock file User: Dave Shaw Loc: RA1AZ0122 Code: Returns
05 Mar 2026 13:28	Stock Adj. Reason: Added to stock file User: Dave Shaw Loc: RA1AR0141 Code: Advanced A

## Behind the scenes

An issue was highlighted during the UAT for the new picking process. This has been resolved as part of this update.

A lot of time has been going into the packing process and validating the picking piece on the new devices is working.

Major preparation done for being able to purge old data from the database to improve performance. Plan is to start the purge soon after this release to speed up the system and free up system resources to enable Roxor to use this for other systems.
